

# ESET online Scanner

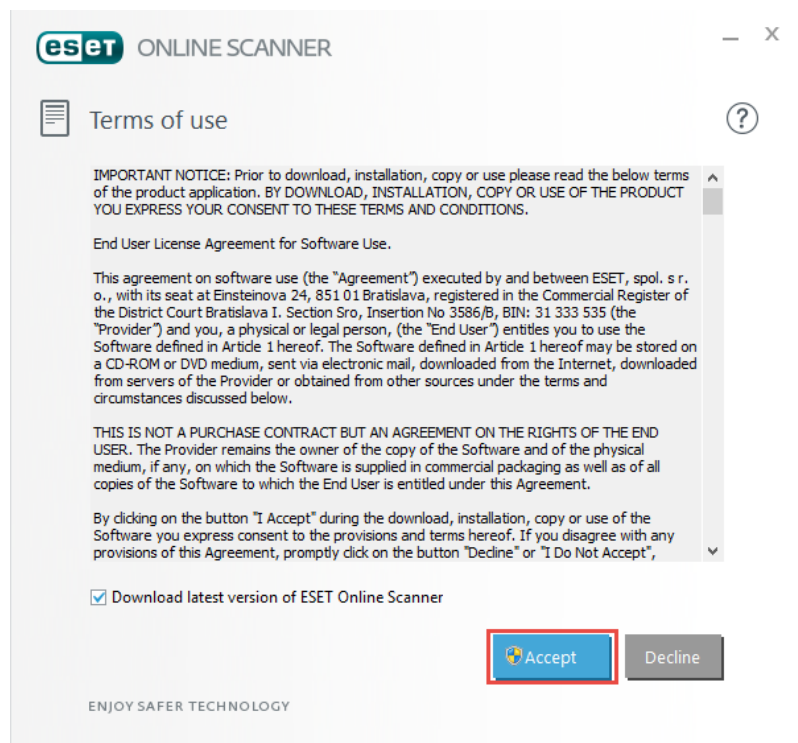

1. Download ESET online scanner from the below link:

[https://download.eset.com/com/eset/tools/online\\_scanner/latest/esetonlineScanner\\_enu.exe](https://download.eset.com/com/eset/tools/online_scanner/latest/esetonlineScanner_enu.exe)

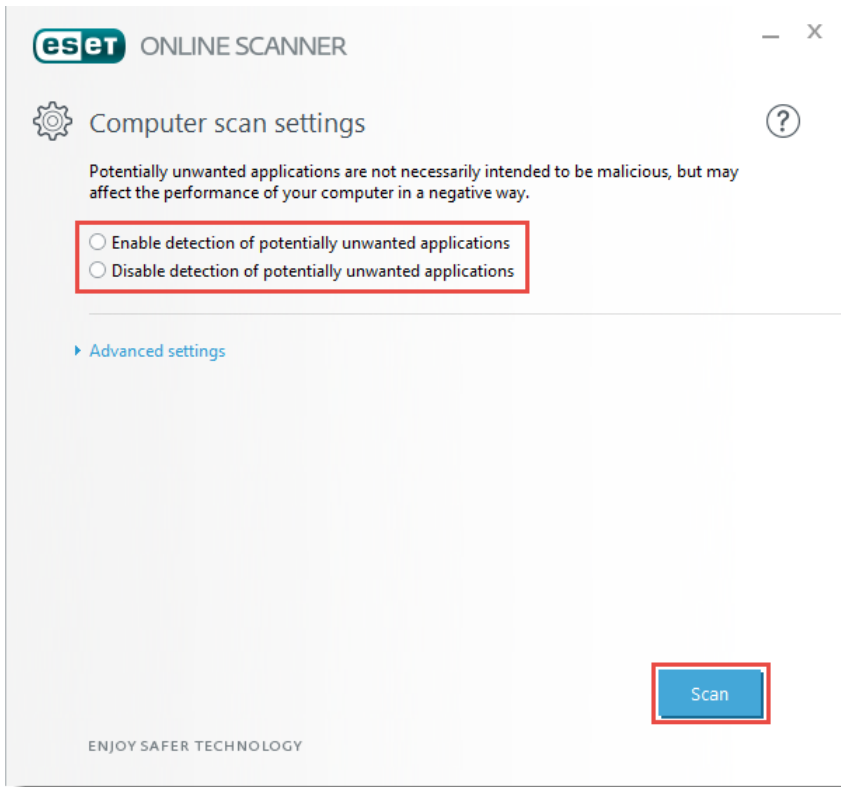

2. Double-click the.exe file you downloaded to run the installer.

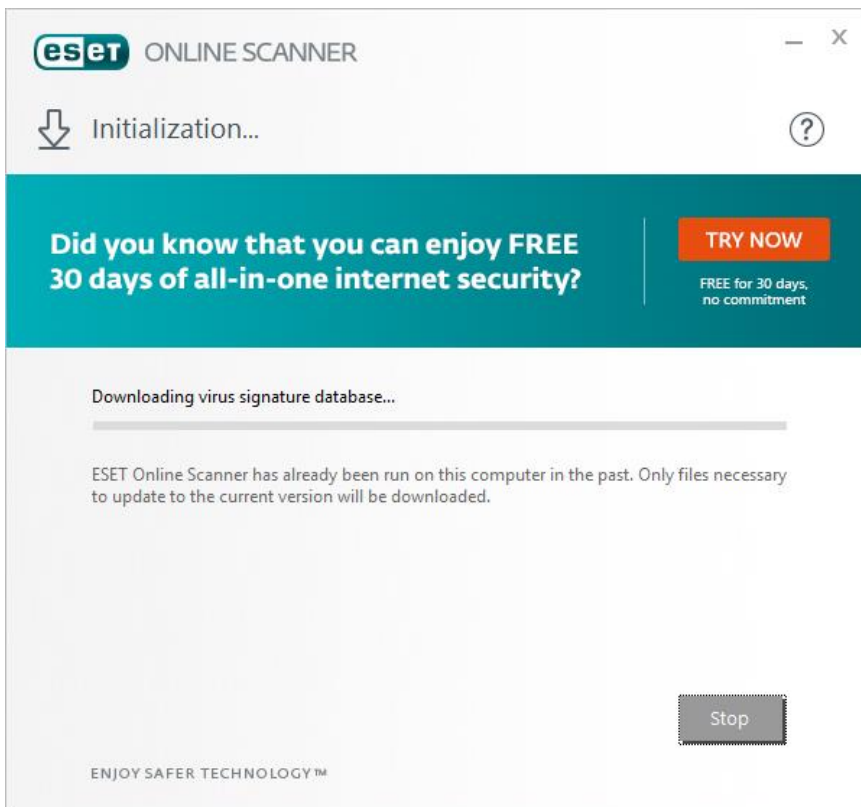

3. In the **Terms of use** screen, click **Accept** if you agree to the Terms of use.

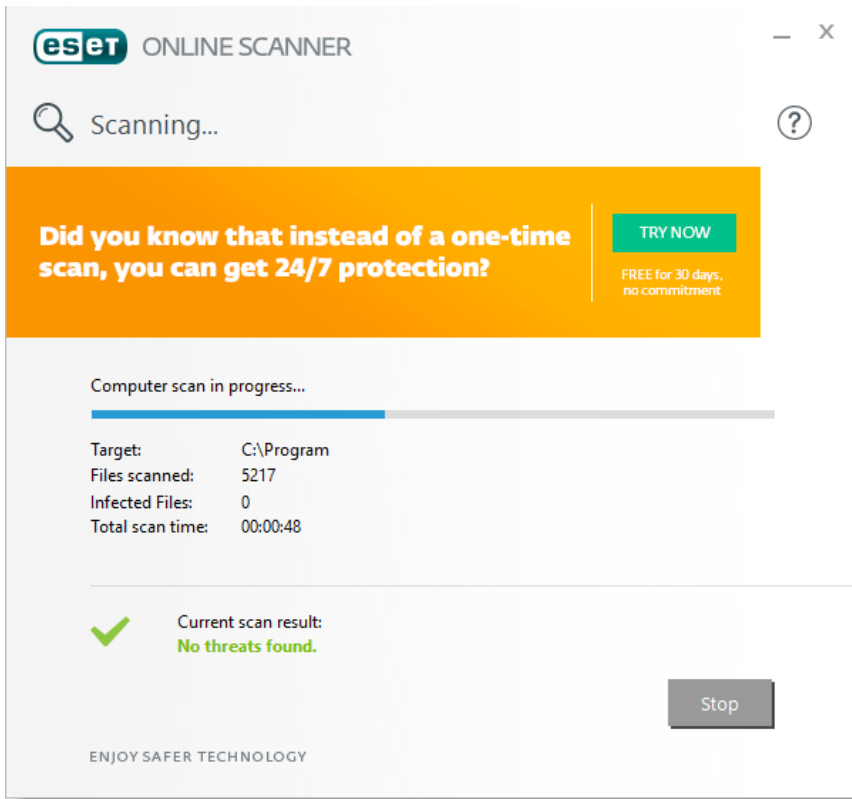

4. Select enable the detection of potentially unwanted applications. You can modify the Advanced settings of the scanner to customize the scan (for example, to add or change scanned drives). Click scan to start the scan.

5. ESET Online Scanner will download the latest virus signature database to ensure that threat detection is current. The database should take no more than a couple of minutes to download on a broadband connection.

6. Scan progress is shown via the progress bar along with the path and title of file being scanned. The number of threats found is shown immediately. You can click **Stop** to terminate scanning at any time.

7. When the scan is finished, scan results are automatically displayed.

To delete all files and folders ESET Online Scanner created, select **Delete application's data on close** and then click **Finish**.
